

Animal Feed Milling

Continuous Single Shaft Mixers WAH

Description ▼

WAH is a Continuous Horizontal Single Shaft Mixer suitable for mixing dry bulk solids (powders, granules, short fibres), dry bulk solids with liquids (conditioning & granulating), sludges and pastes.

WAH Mixers operate on the principle of a mechanically generated fluid bed. Ploughshare or shovel-shaped mixing tools rotate close to the horizontal, cylindrical drum casing lifting the components to be mixed from the product bed into the open mixing area. The quality of the mixture is achieved before the product reaches the mixer outlet.

Function ▼

The particular shape, position and rotation speed of the mixing tools, creates a centrifugal vortex motion, which allows the products to be projected in a three-dimensional way and to merge with each other.

This ensures that components with different particle size and bulk density are perfectly blended and mixed with high precision within the shortest possible time.

Application ▼

Usually for mixing different types of materials:

- Mash
- Meals
- Salt Lick and Minerals
- Milk Replacer
- Pet Food
- Fish Food
- Animal Care
- Feed Additives
- Veterinary products
- Animal Feed products in general

Benefits ▼

- ✓ **Mixing homogeneity 1:100.000, CV <5%;**
- ✓ **High speed mixing (short mixing time);**
- ✓ **Low material residue;**
- ✓ **Minimum wear/low maintenance;**
- ✓ **Easy access to all internal parts of the mixer.**

Animal Feed Milling

Continuous Single Shaft Mixers WAH

Technical Features / Performance ▼

- ▶ From 75 up to 15,000 litres volume
- ▶ Different construction materials
- ▶ Different types of mixing tools
- ▶ Choppers and liquid injection
- ▶ Great variety of accessories and options available
- ▶ Adjustable front discharge

Overall Dimensions ▼

	A	B	C	50%  dm³/h Residence Time		Empty Weight (kg)
				60 s	180 s	
WAH 00075	1,690	485	556	2,022	674	210
WAH 00150	1,960	570	634	4,031	1,344	350
